1. A method of manipulating a stream of video data in a CableCARD device, comprising:

receiving a stream of video data from a host, the stream of video data being encoded according to a first coding;

transcoding the stream of video data to convert the stream of video data to a second coding, producing a transcoded data stream; and

sending the transcoded data stream back to the host.

- 2. The method according to claim1, wherein the stream of video data includes encrypted data.
- 3. The method according to claim 2, further comprising decrypting the encrypted data.
- 15 4. The method according to claim 3, further comprising encrypting the transcoded data stream.
 - 5. The method according to claim 1, wherein the second coding comprises MPEG compliant coding.
 - 6. The method according to claim 1, wherein the CableCARD comprises an OpenCable™ compliant CableCARD.
- 7. The method according to claim 1, wherein the second coding comprises
 25 MPEG 2 compliant coding, and wherein the first coding comprises one of MPEG
 4 compliant coding, MPEG 7 compliant coding, Wavelet compression coding, and
 AVC coding.

Docket No.: SNY-T5780_01

8. A method of manipulating a stream of video data in a CableCARD device, comprising:

receiving a stream of video data from a host, the stream of video data being encrypted and encoded according to a first coding;

decrypting the encrypted data;

transcoding the stream of video data to convert the stream of video data to a second coding, producing a transcoded data stream;

encrypting the transcoded data stream; and sending the encrypted transcoded data stream back to the host.

- 9. The method according to claim 8, wherein the second coding comprises MPEG compliant coding.
- 10. The method according to claim 8, wherein the CableCARD comprises an OpenCable™ compliant CableCARD.
- 11. The method according to claim 8, wherein the second coding comprises MPEG 2 compliant coding, and wherein the first coding comprises one of MPEG 4 compliant coding, MPEG 7 compliant coding, Wavelet compression coding, and AVC coding.

Docket No.: SNY-T5780_01 -10- PATENT

- 12. A CableCARD device for manipulation of a stream of data, comprising: means for receiving a stream of video data from a host, the stream of video data being encoded according to a first coding;
- a transcoder that transcodes the stream of video data to convert the stream of video data to a second coding, producing a transcoded data stream; and means for sending the transcoded data stream back to the host.
 - 13. The CableCARD device according to claim12, wherein the stream of video data includes encrypted data.
 - 14. The CableCARD device according to claim 13, further comprising a decrypter that decrypts the encrypted data.
- 15. The CableCARD device according to claim 14, further comprising an encrypter that encrypts the transcoded data stream.
 - 16. The CableCARD device according to claim 12, wherein the second coding comprises MPEG compliant coding.
- 20 17. The CableCARD device according to claim 12, wherein the CableCARD comprises an OpenCable™ compliant CableCARD.
 - 18. The CableCARD device according to claim 12, wherein the second coding comprises MPEG 2 compliant coding, and wherein the first coding comprises one of MPEG 4 compliant coding, MPEG 7 compliant coding, Wavelet compression coding, and AVC coding.

- 19. A CableCARD device for manipulation of a stream of data, comprising: means for receiving a stream of video data from a host, the stream of video data being encrypted and encoded according to a first coding;
 - a decrypter that decrypts the encrypted data;

5

- a transcoder that transcodes the stream of video data to convert the stream of video data to a second coding, producing a transcoded data stream;
 - an encrypter that encrypts the transcoded data stream; and means for sending the encrypted transcoded data stream back to the host.

10

- 20. The method according to claim 19, wherein the second coding comprises MPEG compliant coding.
- 21. The method according to claim 19, wherein the CableCARD comprises an OpenCable™ compliant CableCARD.

15

22. The method according to claim 19, wherein the second coding comprises MPEG 2 compliant coding, and wherein the first coding comprises one of MPEG 4 compliant coding, MPEG 7 compliant coding, Wavelet compression coding, and AVC coding.
